

INNOVATIVE PACKAGING SOLUTION FOR SINKERS

**The new packaging idea by Groz-Beckert!
Special bundling of sinkers makes handling
more easy in practice.**

This innovative packaging gives Groz-Beckert customers active support with improving their cost-effectiveness. Less handling time directly reduces setting-up times. Inserting sinkers that are packaged in this way gives you shorter setting-up times which means you can lower your production costs considerably in comparison with your competitors.

We can help with your continuous improvement process. So choose innovative packaging technology by Groz-Beckert!

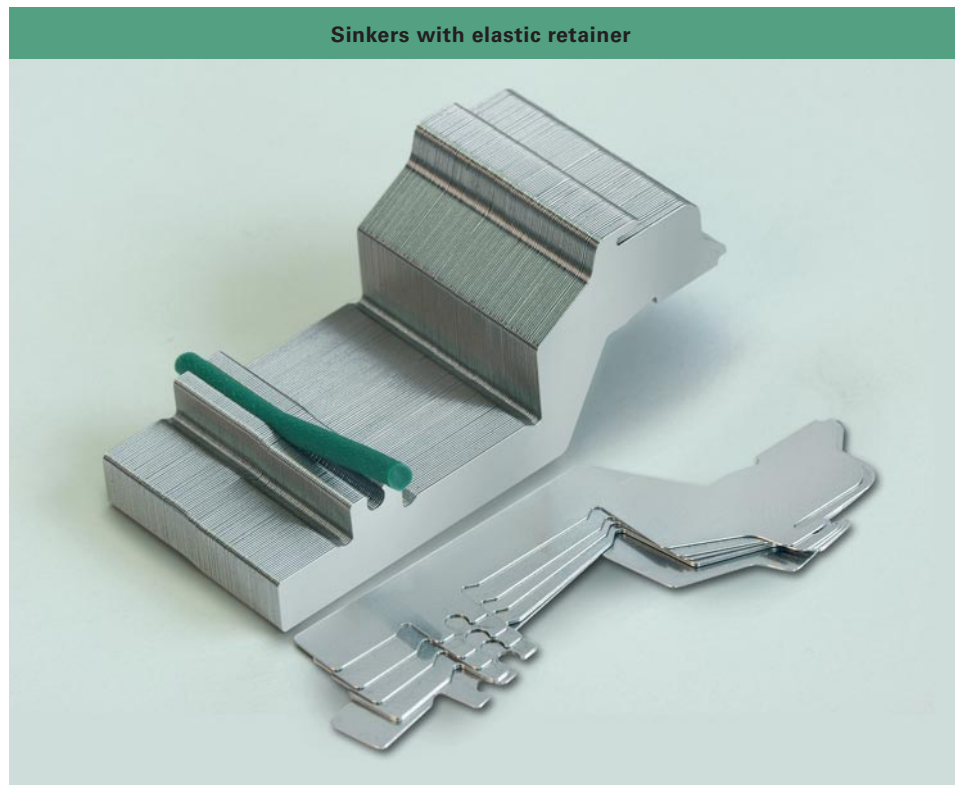

GROZ-BECKERT®
Patent Pending
EP 06002102

FUNCTION

The sinkers are fitted with an opening on the upper edge of the foot. There is an elastic retainer inserted in this opening.

This holds the sinker packet safely together and makes it easy to remove the parts.

Groz-Beckert has patent pending on this invention.

Sinkers with elastic retainer

BENEFITS OF THE NEW GROZ-BECKERT PACKAGING

- The sinkers are packaged in a parallel position and do not have to be lined up in a time-consuming operation before insertion.
- Sinkers that have been removed can be easily inserted in the parts packet again.
- This innovative kind of bundling ensures that no lateral pressure is applied on the sinker packet, which reduces the risk of sticking significantly.
- The sinkers can be easily removed from the knitting machine for cleaning by lifting them out with the retainer and cleaning them. This means that the time-consuming work of lining them up again after the cleaning process is no longer necessary. The retainer can be ordered from Groz-Beckert by the metre.
- After cleaning, the used sinkers can be stored safely until they are needed again in a knitting machine.
